Sir:

The references cited in the attached Information Disclosure Statement by Applicant Form PTO-1449 were previously submitted to the Office on March 8, 2004. In an Office communication dated June 10, 2004, the Examiner advised the Information Disclosure Statement filed on March 8, 2004, failed to comply with 37 C.F.R. § 1.98(a)(2), and the references referred to in the Information Disclosure Statement (Form PTO-1449) would not be considered. In response to the Examiner's comments, enclosed please find a resubmission of the Form PTO-1449 of March 8, 2004, and copies of each of the references cited therein.

The Examiner is requested to consider the references noted on the enclosed Form PTO-1449 during examination of the above-identified patent application. These references are submitted for the Examiner's consideration and are submitted pursuant to the duty of disclosure under 37 C.F.R. § 1.56. In submitting these references, no representation is made or implied that the references are or are not material to the examination of the application. The Examiner is encouraged to make his or her own determination of materiality.

Application No. 09/803,603
Attorney Docket No. 5451.23
Express Mail Label No. EV 423 774 971 US

Pursuant to 37 C.F.R. § 1.98(a)(3)(i), any information disclosure statement filed under 37 C.F.R. § 1.97 shall include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 C.F.R. § 1.56(c) most knowledgeable about the content of the information, of each patent, publication or other information listed that is not in the English language. The concise explanation may be either separate from the specification or incorporated therein.

The following foreign patents are not in the English language: French Patent Nos. 89,009; 89,347; 328,506; 2,003,598; 2,108,579, and 2,500,311; and German Patent No. 2,436,594. To satisfy the requirement for a concise explanation of these non-English references, English translations are attached to French Patent Nos. 89,009; 89,347; 328,506; 2,108,579, and 2,003,598, and English translations of Abstracts (from Derwent) are attached to French Patent No. 2,500,311 and German Patent No. 2,436,594.

Also, Austrian Patent No. 209202 is not in the English language: To satisfy the requirement for a concise explanation of this non-English reference, the Applicant notes the following:

Austrian Patent No. 209202 shows a bicycle seat that appears to be adapted to be moved fore and aft with respect to the seat post. However, from the drawing, it is not entirely clear how the structure works. A first tube 4 appears to be mounted to slide back and forth in a second tube 3. Both tubes are arranged horizontally. The first tube 4 may be fixed in relation to the second tube by way of a spring-loaded pin 13 that is actuated via a lever mechanism 16.

The references cited and marked with an asterisk (*) on Form PTO-1449 were cited in an International Search Report dated 29 September 2003, in related International Application No. PCT/US03/06593. Copies of the references cited in the International Search Report are provided herewith. Also, a copy of the International Search Report is enclosed herewith.

During a review of our file, we noticed that in the October 7, 2003 Office action in this case, a copy of an earlier filed PTO-1449 is included with a September 29, 2003 consideration date. GB 1,469,363 is listed on the PTO-1449, but is not initialed or struck through, so it is unclear whether it was considered. Thus, GB 1,469,363 is resubmitted herewith for the Examiner's convenience.
